ABSTRACT

This bibliography, compiled primarily for instructors and students of comparative and international education courses at the university level, is organized by topic and geographic area. Topics covered include: (1) general materials in the field of comparative and international education, including references and sources of data; (2) standard texts and works on methodology; (3) Third World educational themes and problems, including colonialism and modernization; and (4) international education, including education for international understanding, exchange programs, the "brain drain," and area studies programs. The geographic area lists include Europe, Africa, Latin America, Asia, and the Middle East. Further subclassifications are made in this section under: (1) general, including multi-national studies, (2) history, (3) philosophy, (4) politics, (5) sociology, (6) economics, and (7) psychology. The majority of entries have been published since 1965. (Author/RL)
